O&M devops engineer

Application deadline: 2025-06-10

Budapest

Magyar Telekom Nyrt.

Teljes munkaidő- határozatlan idejű

You are the ideal candidate, if you have...

- Solid Linux system administration skills.
- Proficiency in programming, including shell scripting and Python.
- Proven experience in test automation.
- Strong understanding of IT/NT management systems, their purpose, and functionalities.
- Experience in vendor management and steering.
- Excellent communication skills in English.

It's an advantage if you have...

- Experience with cloud-native application deployment and operation (Docker, Kubernetes).
- Ability to deliver high-quality presentations.
- Knowledge of industry trends in telecommunications and IT.
- Windows server administration experience.

What we offer

- The opportunity to work on cutting-edge network technologies and shape the future of telecommunications.
- Continuous professional development through training and courses (e.g., Coursera, Percipio).
- Flexible working hours with partial home office options.
- Comprehensive benefits package (laptop, mobile phone, cafeteria, insurance).
- Employee discount rates on Telekom services.
- Modern, multinational working environment with amenities like a sky bar and rooftop gym.

- Access to our Employee Assistance Program.
- Comprehensive Healthcare Package
- You will receive a minimum of 25 days of basic vacation per year (based on age)
- We offer 15 days of additional vacation if you become a father, with 100% pay

Training opportunities

- You'll have access to thousands of professional and skills development materials from our extensive digital training palette
- We offer regular internal training sessions and workshops
- You can learn English and German, even with a native speaker
- You'll have access to Percipio and Coursera courses

This position is for you, if you are interested in the following tasks

- Manage the full lifecycle of Ericsson network management products, from release planning to deployment and ongoing maintenance.
- Conduct thorough software validation and testing to ensure quality and reliability.
- Contribute to the design and implementation of network management solutions.
- Steer vendors to meet our specific requirements and deliver optimal solutions.
- Operate and maintain live network elements, ensuring high availability and performance.
- Maintain the operational readiness of the RAN laboratory, including tools and daily operations.
- Develop and implement automation solutions using Ansible, Jenkins, and other relevant tools to streamline processes and improve efficiency.
- Collaborate with international teams to share knowledge and best practices within our collaborative and supportive environment.

When?

- Whenever you can join us!

Where?

- Flexible, hybrid working method (3 days from home and 2 days from Magyar Telekom HQ)
