Technical Product Manager (Cloud)

Application deadline: 2026-11-10

Budapest

Magyar Telekom Nyrt.

Teljes munkaidő- határozatlan idejű

About the team

Shape the Future of Cloud Technology with Us

- Group Network Technology (GNT) is a key part of Deutsche Telekom, where international teams shape and deliver innovative telecommunications IT and network technology solutions across Europe - from architecture and engineering to development, testing, infrastructure, and operations.
- In Cloud, we build and operate Deutsche Telekom's on-prem Telco Cloud across all layers - from hardware to orchestration - based on open-source technologies. This is where modern infrastructure meets real-world impact at scale.
- Our chapter-based model creates a strong home for expertise, learning, and collaboration - empowering people to grow, contribute in agile teams, and thrive in an inclusive environment while making a meaningful difference for our customers.
- Team members work from their local organizations at Magyar Telekom while contributing to international teams across Europe.

What You'll Do

- As a Technical Product Manager, you will help define and drive the evolution of cloud products and platforms. You will work at the intersection of technology, business, and customer needs, collaborating with engineering teams and stakeholders across Deutsche Telekom to deliver scalable, reliable, and innovative cloud solutions.
- Our cloud platforms power critical telecommunications workloads across multiple

markets, enabling core services such as voice, messaging, mobile data, and 5G connectivity for millions of customers. You will help shape the platforms that support the future evolution of Deutsche Telekom's network and service landscape.

Key responsibilities:

- Define product vision, strategy, and roadmap for cloud products and platforms.
- Understand customer needs, market trends, and business priorities.
- Translate complex technical challenges into clear product requirements and actionable roadmaps.
- Drive product discovery, prioritization, and delivery together with engineering and cross-functional teams, including architecture, security, operations, and business stakeholders.
- Monitor product performance, customer adoption, and user feedback to continuously improve outcomes.
- Communicate product direction, priorities, and progress while aligning stakeholders across teams and organizational levels.

Benefits

- You can use your cafeteria allowance for a range of benefits from a predefined selection.
- With our telecommunications discount, Telekom services are available to you and your family members as well.
- A comprehensive, high-value TritonLife healthcare package, including outpatient and ambulatory care, minor and major diagnostic examinations, day surgery, preventive and screening packages, as well as online and telephone medical consultations.
- We provide you with a company laptop and a high-end mobile phone.
- Discounted employee and family mobile plans will be available to you.
- You will receive a minimum of 25 days of basic annual leave, depending on your age.
- We provide 15 additional days of paternity leave with 100% pay when you become a father.
- Our Employee Assistance Program provides support when you need it.
- We provide travel cost reimbursement for commuting to work and weekend trips home.
- You will receive a referral bonus for successfully recommending a new colleague.
- As part of our onboarding program, you will receive mentor support to help you settle into your new workplace.
- You will have access to employee life insurance, healthcare offers and screening programs.
- You can stay active in our on-site gym and rooftop running track.
- We provide complimentary coffee and tea in our kitchens to help you recharge.

approach.

When?

- You can join us whenever it suits you

Where?

- We work in a flexible, hybrid setup with three days from home and two days at the Telekom Campus
