

Product Manager – Cloud & Datacenter services

Application deadline: 2025-08-26

Budapest

Magyar Telekom Nyrt.

Teljes munkaidő- határozatlan idejű

Where you'll make an impact:

- Become part of the Product Management Center of Expertise, within Magyar Telekom's Enterprise Unit with end-to-end responsibility for the standard and convergent products.

Your responsibilities:

- Manage product line lifecycle from annual strategic planning to quarterly tactical activities.
- Define and fine tune customer journey for your products.
- Balance business, engineering/tech and UI/UX aspects of product portfolio management.
- Improve service content, features and related processes to meet market needs
- Identify new ideas and conduct agile market testing based on market research and client intelligence.
- Drive a solution set across development teams from market requirement to process support.
- Support sales and marketing with the necessary product knowledge and technical expertise.
- Develop sales tools and sales training material.
- Use market feedback to initiate product refinements and ongoing development; conduct benchmarking.
- Educate customers at conferences, client meetings and other sales events
- Keep close connection with technology providers, manage supplier/developer ecosystem.
- Co-ordinate market research to track customer and end-user feedback.
- Create reports, presentations and provide

information for senior management.

When?

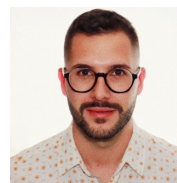

- You can join the team immediately.

- Arrange your working hours on your own, even opting for partial telework.
- Continuously develop your expertise and obtain competitive professional knowledge.
- Our Campus features a gym on the rooftop with running track.
- Access to thousands of professional and skill development resources from our wide-ranging digital training library.
- Regular internal training sessions and workshops.
- English and German language learning opportunities (even with native-speaking instructors).
- Access to Percipio and Coursera courses.

Where?

- Thanks to our hybrid working model, you can work from the Telekom Campus or remotely from home.
