

DevOps Intern

Jelentkezési határidő: 2025-07-18

Budapest

Magyar Telekom Nyrt.

Gyakornok

You are the ideal candidate, if you have...

- Active studies at a professional college / university in Computer Science, IT, or related field (final-year student)
- The possibility to work 20 hours a week remotely
- At least basic IP network, Linux/Docker/Kubernetes, Gitlab CI/CD skills
- Experience in different programming languages (shell, Golang, C)
- Solid English skills at communication level (both written and verbal)
- Good problem-solving skills, result-oriented personality, "can do" approach
- Strong communication skills and ability to collaborate effectively with others

It's an advantage if you have...

- CI/CD experience
- Docker/Kubernetes skills
- DevOps approach

In return you...

- Can spend your internship with us
- Have the possibility of using a fitness room and running track next to our rooftop bar if you would like to keep fit
- Get unlimited coffee and tea consumption if you are not working in a home office
- Onboarding program supporting workplace integration, supported by a mentor

The project or topic you would work on

- In this position, you will have the opportunity to gain an insight into the operation of a market-leading telecommunications company, get to know the latest technologies, and your professional development and integration will be supported by a mentor.
- In the following 15 min short video you have the opportunity to learn about what services you will support with your activities:
- English version: <https://youtu.be/fqJDPQal1DE>
- Hungarian version: <https://youtu.be/0Bjg8lj92to>

This position is for you, if you are interested in the following tasks

- Assist in setting up and maintaining CI/CD pipelines for development teams
- Monitor application and infrastructure performance, identifying and resolving issues proactively
- Collaborate with team members to streamline workflows and optimize system performance
- Contribute to writing automation scripts and basic infrastructure code
- Collaborate in Agile teams and participate in stand-ups and reviews

- If, in addition to preserving your health, you also pay attention to the environment and come to work by bike, we provide you bicycle storage in our underground garage

Training opportunities

- Get a mentor who can drive you in your daily professional work and growth
- Can work in a multinational and modern environment
- Can continuously develop your expertise and gain competitive professional knowledge
- Can work in a dynamic team

Where?

- We mostly work remotely, but on a pre-scheduled date we meet at the Telekom headquarters (1097 Budapest, Könyves Kálmán krt. 36.)
